Packard Bell Maestro LED series The slimmest Maestro ever

- Ultra-slim and cool design
- Full HD experience
- Incredible features
- Environmentally friendly

Does a beautiful frame add to the beauty of the artwork it holds? This is the premise that led to the development of the new ultra-slim **Packard Bell Maestro LED series** displays. **Packard Bell Maestro 220 LED** and **Maestro 240 LED** enclose their subject in widescreen splendor and deliver the most outstanding viewing experience.

The new **Packard Bell Maestro LED** 21.5 and 24-inch widescreen displays raise the bar for design and ergonomics. The razor-thin design of the **Packard Bell Maestro LED** series blends into the background and in any room, placing the performance of the display on centre stage.

Only 10,8 mm or 15,6 mm thick, **Packard Bell Maestro 220 LED** and **Maestro 240 LED** are drawn with pure, minimalist lines. They make elegant use of a glossy black frame and sport an elegant stand making them beautiful to look at, even when they are turned off.

Full HD experience

Packard Bell Maestro 220 and 240 LED are ideal to use as a PC monitor but they are also capable of displaying HD video content from HD devices such as Blu-ray disc players and HD camcorders.

The **Packard Bell Maestro 220 and 240 LED** deliver the consummate viewing experience for games, photos, HD movies, videos and graphic-intensive applications, thanks to the ultra-fast 2ms video response time, 12 million:1 dynamic contrast ratio, 1920x1080 HD resolution and matTE view coating. In addition, they come with a DVI connector with HDCP support to display HD content directly from external devices.

Eco-friendly

The **Packard Bell Maestro 220 and 240 LED** monitors are Windows® Vista Certified and meet the stringent Energy Star 5.0 saving standards. LED backlit, they are mercury free and consume 68% less energy than a standard monitor, a significant power saving feature.

The slim **Packard Bell Maestro 220 LED** will be available in European outlets in July 2010, while the slim **Packard Bell Maestro 240 LED** will be available in August 2010.

Availability and prices vary according to country.

About Packard Bell

Packard Bell pioneered the use of the PC in the home, taking an office tool and turning it into a friendly, indispensable feature of today's modern home. Stylish products with cool features, accessible to everyone, are the hallmarks of the brand - a unique combination that no other brand in the European market offers today. In 2008, Taiwan-based Acer Inc. acquired Packard Bell. In 2009, the Acer Group fully benefited from its multi-brand strategy, establishing itself as the second-largest PC company in the world and as the number two worldwide notebook vendor. Within the Acer Group, Packard Bell strives to design environmentally friendly products and establish a green supply chain through collaboration with suppliers.
